CLOUD
MANAGEMENT SUITE

Predictive & Advanced IT Management

Cloud Management Suite gives you the complete picture of your entire IT environment from the cloud. Automatically discover network devices, remotely deploy software applications and automate patch management. A single web-based console allows access to any device from anywhere.

DISCOVERY & INVENTORY

See every device on your network at any time. Hardware and software is presented on screen or exported to vibrant interactive reports. Automatically group devices into sites or networks based on their IP address.

SOFTWARE DISTRIBUTION

Distribute new software packages to one or many endpoints automatically. Unique technology minimizes network bandwidth even when deploying large applications to thousands of endpoints from the cloud.

REMOTE CONTROL

Remote control endpoints from any browser without the need to deploy a remote control client. Cloud Management Suite uses HTML5 for browser-based access to the target desktop.

PATCH MANAGEMENT

Automatically keep desktops, laptops, and remote users up-to-date with patches and software updates. Cloud Management Suite includes patching for Microsoft, Mac, Linux and third-party vendors.

INVENTORY HISTORY

Quickly identify problems and security issues by comparing the configuration of a machine over unique points in time. Access to your history is available from a simple browser with no software required.

REALTIME SECURITY

Stop any breach in real time. Receive live, accurate, data from thousands of devices in under 10 seconds. Instantly detect running .exes, malware or viruses and kill those processes before they spread.

PATCH EVERYTHING

WINDOWS **MAC** **LINUX** **THIRD-PARTY** **DESKTOPS**

LAPTOPS **SERVERS** **LEGACY OS** **VIRTUAL MACHINES** **IOT DEVICES**

TWO-FACTOR AUTHENTICATION

Strengthen your two-factor authentication process with a username and password, Google authentication or email. Enhance security and reduce the risk of online identity theft, phishing and fraud.

REMOTE DESKTOP ACCESS

Give professionals secure access to their work computers from any internet browser now matter where they are. Gain secure, worldwide access to work devices with any phone or tablet for on-the-go control.

IOT DEVICE MANAGEMENT

Cloud Management Suite provides a centralized solution to track IoT devices. Discover every device that is communicating over your network and prevent any loopholes to exploitation.

COMPLIANCE REPORTS

Cloud Management Suite provides detailed reporting to meet HIPAA, SOX, or PCI compliance. Always be prepared for an audit with regular maintenance windows deploying patches.

WINDOWS FEATURE UPDATES

Easily deploy Windows Feature updates, view an accurate count of all your Windows 10 devices and see what version is installed. Control maintenance windows to specify exactly when the update will occur.

SUPPORT & TRAINING

Leverage technical support services to help you enhance your experience with Cloud Management Suite. Set yourself up for success with our in-depth training and instruction for the solution.
